Cage trolley in stainless steel

A case trolley in stainless steel for the hospital industry. The trolley can be used individually for manual transport (as in the picture) or in lorries with up to 8 trolleys.

The gables are solid and made of 25mm pipe profiles. A label plate is placed on the gables.

Safe, stable and easy to operate.

Inside the cage it is possible to place up to four shelves. The baseboard is made of plate with mounted spring-actuated drawbar, a downward-facing drawbar and 4 wheels, 2 of which are pivoting. A fender wheel is mounted on each of the 4 corners as protection.
